

## Appendix 5 to the Regulation of the Doctoral School of Chemistry (DSC)

### **CNADTCU and SDC requirements for the award of the doctoral degree and of the distinctions *satisfactory, good, very good and excellent***

The criteria established by the CNADTCU specialist commission shall be taken into account for the award of the doctoral title and for the award of distinctions.

The CNADTCU requirements for the award of the title of Doctor of Chemistry that must be fulfilled simultaneously are:

1. the publication of at least two articles in ISI impact factor listed journals;
2. the cumulative impact factor (CIF) of the journals in which the articles are published must be at least 1.5 or there must be at least one article published in journals in the ISI Q3 area, and the doctoral candidate must be the first author of at least one article published in an ISI-listed journal;
3. the doctoral supervisor and the doctoral candidate must co-author at least one article published in an ISI-listed journal.

For the award of the distinctions *good, very good and excellent*, the doctoral candidate must additionally fulfil the following conditions imposed by the Doctoral School of Chemistry (DSC):

- a) for the doctoral candidate to receive the distinction “good”, he/she must present as first author at least one publication in a journal with an impact factor greater than 1;
- b) for the distinction “very good”, the doctoral candidate must present at least two publications in journals ranked in the first half for this field (in the yellow zone) and for at least one of these he/she must be the first author;

- c) for the distinction “excellent”, the doctoral candidate must submit at least one publication in the red zone (in a journal in the first 25% of the field) for which he/she is the first author and at least one other publication in a journal in the yellow zone (in the first half).
