ENROLLMENT IN THE DOCTORAL SCHOOL OF CHEMICAL ENGINEERING

The application (registration) of candidates for the 2023 - 2024 doctoral admission competition, for the Chemical Engineering field, is done exclusively online in the admission platform admitere.ubbcluj.ro during the time period between **10 – 14 July 2023 / 4 – 8 September 2023.**

• The candidate will create an account on the platform with an email account that the candidate uses frequently. In the application (registration, admission, confirmation process, through the application platform), are generated and sent messages that require feedback from the candidate.

• During the application (registration) period, according to the calendar, the candidate will upload a set of documents to the application platform (according to the Admission information link).

The candidates may find **additional details** about the admission topics, the calendar and the admission schedule to the Doctoral School of Chemical Engineering at this link.

Notes:

We ask all candidates to fill in the required data correctly and completly. The application (registration) file must be complete.

The distribution of declared admitted candidates by types of places will be done within the limits of the available places (only for the places financed from the Romanian state buget).

At the end of the admission session in September 2023, the admitted candidates will be redistributed, according to their requested options (preferences) and according to the types of (vacancy) places that will become available after the two admission sessions (only for the places financed from the Romanian state buget).

The confirmation of the place occupancy will be made both online (on the application platform) and onsite by providing original documents.

Supplementary information may be found on the Admission information site.
