

Minimum standards for the award of the degree of Doctor of Chemical Engineering

The following minimum standards must be met in order for a doctoral candidate to be awarded the degree of Doctor of Chemical Engineering:

Publication of at least two scientific articles in ISI-indexed journals that simultaneously fulfil the following criteria:

- a) the sum of the impact factors (IF) of the journals in which articles were published (considered at the date of publication) must be greater than or at least equal to 1.5;
- b) the articles include data presented in the doctoral thesis;
- c) for at least one article the doctoral candidate is the first author;
- d) for at least one article the doctoral supervisor is co-author.
